

WIDE-BELT SANDERS

MAIN CATALOGUE 2025/26

OFFER FOR OUR CUSTOMERS WHO ARE ENTREPRENEURS AND NOT CONSUMERS

Wide-belt sanding

CASADEI LIBRA 10/95 TC

Compact wide belt sanding machine with combination sanding unit

- ▶ Combination sanding unit with sanding pad for fine sanding
- ▶ With inclined grooved steel roller Ø 120 mm for calibration as standard
- ▶ Fine adjustment of the working height
- ▶ Clear control panel on the front
- ▶ Robust tube-stiffened monobloc steel machine body, robot-welded, working units mounted high up for maximum rigidity
- ▶ Motorised height adjustment of the work table with digital display
- ▶ Electronically controlled sanding belt oscillation
- ▶ Carpet feed via geared motor with two speeds
- ▶ Natural rubber feed carpet with negative profile
- ▶ Flexible steel pressure rail in front of the first unit
- ▶ Rubber pressure rollers, in front of or behind each working unit
- ▶ Pneumatic belt tensioning with decimal correction option for grain size/belt thickness
- ▶ Can be used universally for solid wood and veneer thanks to the combination unit
- ▶ Entry-level model for smaller companies
- ▶ Working width 950 mm

Combined unit for calibrating and fine sanding

- ▶ Slanted ribbed steel roller Ø 120 mm with fine height adjustment
- ▶ Hard sanding pad with graphite coating
- ▶ Universal version for calibrating and sanding solid wood, chipboard and veneer

Model	LIBRA 10/95 TC
Article no.	5222100
Technical data	
Sanding width	950 mm
Working height min./max.	4 / 170 mm
Sanding belt width	970 mm
Sanding belt length	1,525 mm
2 feed speeds	4.5 - 9 m/min
Feed motor	0.33 / 0.55 kW
Table adjustment motor power	0.25 kW
Motor power	7.5 kW

*Do you have special requirements? Talk to us:
We will be happy to create a customised offer for you!*

MADE IN ITALY

Option

Automatic table positioning

- ▶ Automatic adjustment of the work table height via microswitch without correcting the material removal
- ▶ Optionally available for Libbra 10

Options

Options	Article no.
Automatic table positioning with button	5259074
Switching the sanding pad on and off from the control panel	5256060
Switching the roller on and off from the control panel	5256062
Electronic programming unit "FOX 500 KTR" (requires 5256060, 5256062, 5256073)	5256063
Automatic carpet centring	5256067
Table extension at the front and rear with 2 infeed and outfeed rolls	5256068
Semi-hard flat grinding shoe	5256073
Amplified motor 11 kW	5256064
Oscillating blowing device	5256069

Further options are available on request!

Wide-belt sanding

CASADEI LIBRA 35

Wide-belt sander in single or double belt design up to 1100 mm with many equipment options

- ▶ The LIBRA 35 calibration and fine sanding machine is an extremely versatile machine with a wide range of uses
- ▶ Robust, tube-stiffened monobloc steel machine body with working units mounted high up for maximum rigidity
- ▶ User-friendly thanks to clear control panel on the front
- ▶ Motorised table height adjustment
- ▶ Digital display for the working height
- ▶ Electronically controlled sanding belt
- oscillation with reduced compressed air requirement
- ▶ Automatic star-delta starting for main motor
- ▶ Natural rubber feed carpet with negative profile
- ▶ Support table with two rollers at the inlet and outlet of the feed carpet
- ▶ Carpet feed via geared motor with two speeds
- ▶ Flexible steel pressure rail in front of the first unit
- ▶ Rubber pressure rollers, in front of and behind each working unit
- ▶ Pneumatic belt tensioning per unit with decimal correction option for grain size/belt thickness

Execution TC

- ▶ Combination unit with finely adjustable working height for calibrating and fine sanding
- ▶ With slanted ribbed steel roller Ø 120 mm and hard sanding pad with graphite coating on replaceable insert
- ▶ Fine adjustment of the working height

Execution RTC

- ▶ 1. Unit with slanted steel roller Ø 120 mm and fine adjustment for calibration
- ▶ 2. Unit, combination unit with finely adjustable working height for calibrating and fine sanding with rubber-coated roller Ø 120 mm (45 Sh) and hard sanding shoe with graphite coating on replaceable insert

Wide-belt sanding

CASADEI LIBRA 45/2 – dual-belt design

CASADEI LIBRA 45/3 – three-belt design

- ▶ The LIBRA 45 features extensive standard equipment, a robust design – both in terms of the base frame and the working units – grinding shoes with a larger contact surface and modern control systems.
- ▶ Motorised table height adjustment
- ▶ Digital display for the working height
- ▶ Electronically controlled sanding belt oscillation with reduced compressed air requirement
- ▶ Automatic star-delta start-up
- ▶ Natural rubber feed carpet with negative profile
- ▶ Intermediate lacquer sanding possible
- ▶ Automatic carpet centring
- ▶ Support table with rollers at the infeed and outlet of the feed carpet
- ▶ Large sanding roller Ø 140 mm
- ▶ Carpet feed via geared motor with two speeds
- ▶ Flexible steel pressure rail in front of the first unit
- ▶ Rubber pressure rollers, in front of and behind each working unit
- ▶ Pneumatic belt tensioning per unit with decimal correction option for grain size/belt thickness
- ▶ Optional RTC 110 version with planing shaft unit Ø 140 mm instead of the first sanding unit (with 312 indexable inserts with four cutting edges each, link pressure element, kickback protection and pneumatic cylinder)

RR

Execution RR

- 1. Unit with slanted ribbed steel roller Ø 140 mm and fine adjustment, 2. Unit with rubber-coated roller Ø 250 mm (45 Sh) and fine adjustment
- Optionally with planing shaft unit instead of the first sanding unit

RTC

Execution RTC

- 1. Unit with slanted ribbed steel roller Ø 140 mm and fine adjustment, 2. Unit: Combination unit with finely adjustable working height for calibrating and sanding with rubber-coated roller Ø 140 mm (45 Sh) and hard sanding shoe with graphite coating on replaceable insert
- Pneumatic switching on/off of the sanding pad from the control panel
- Optionally available with planing shaft unit instead of the 1st. Sanding unit (only for 110)

RRR

Execution RRR

- 1. Unit with slanted ribbed steel roller Ø 140 mm and fine adjustment, 2. Unit with rubber-coated roller Ø 160 mm (65 Sh) and fine adjustment
- 3. Unit with rubber-coated roller Ø 250 mm (45 Sh) and fine adjustment
- Optionally with planing shaft unit instead of the first sanding unit

RRTC

Execution RRTC

- 1. Unit with slanted ribbed steel roller Ø 140 mm and fine adjustment, 2. Unit with rubber-coated roller Ø 140 mm (65 Sh) and fine adjustment
- 3. Unit: Combination unit with finely adjustable working height for calibrating and sanding with rubber-coated roller Ø 140 mm (45 Sh)
- Pneumatic switching on/off of the sanding pad from the control panel
- Optionally with planing shaft unit instead of the first sanding unit

Wide-belt sanding

CASADEI LIBRA 65

Wide-belt sanding machine as two or three-belt version up to 1350 mm sanding width, optionally with cross sanding unit

- ▶ High-quality results when processing solid wood, veneer or raw material as well as for intermediate lacquer sanding
- ▶ Heavy duty design of entire machine
- ▶ Control panel with dustproof membrane keypads on the front of the machine
- ▶ Optimum cooling and long service life of the sanding belts (sanding belt length 2620 mm)
- ▶ Automatic star-delta start-up
- ▶ Motorised table height adjustment
- ▶ Digital display for the working height
- ▶ Electronically controlled sanding belt oscillation with reduced compressed air requirement
- ▶ Natural rubber feed carpet with negative profile
- ▶ Automatic carpet centring
- ▶ Support table with two rollers at the inlet and outlet of the feed carpet
- ▶ Rubber pressure rollers, in front of and behind each working unit
- ▶ Flexible steel pressure rail in front of the first unit
- ▶ Carpet feed via geared motor with two speeds
- ▶ Pneumatic belt tensioning per unit with decimal correction option for grain size/belt thickness
- ▶ Function check on the control panel for circuit breakers, thermal circuit breakers, operating pressure and brakes
- ▶ Optional RTC/RRTC version with planing shaft unit instead of the first sanding unit (with 520 indexable inserts, each with four cutting edges)

RRR

Execution RRR

- 1. Unit with slanted ribbed steel roller Ø 140 mm and fine adjustment, 2. Unit with rubber-coated roller Ø 160 mm (65 Sh) and fine adjustment
- 3. Unit with rubber-coated roller Ø 250 mm (45 Sh) and fine adjustment
- Optionally with planing shaft unit instead of the first sanding unit

RRTC

Execution RRTC

- 1. Unit with slanted ribbed steel roller Ø 140 mm and fine adjustment, 2. Unit with rubber-coated roller Ø 140 mm (65 Sh) and fine adjustment
- 3. unit: Combination unit with finely adjustable working height for calibrating and sanding with rubber-coated roller Ø 140 mm (45 Sh)
- Pneumatic switching on/off of the sanding pad from the control panel
- Optionally with planing shaft unit instead of the first sanding unit

CASADEI LIBRA The controls

SMARTCONTROL S

SmartControl S electronic control unit with Easy2Go Sand

For machines with elastic or electronic sanding pads instead of the standard FOX-500 control

Touchscreen colour display 10"

Machine management:

- Machine management via touchscreen operation with the option to store up to 999 work programmes
- Overall operation of the electronic sectional grinding pad with 3 operating modes:
 - Sectional grinding pad switched off
 - Sectional sanding pad activated with all segments
 - The sectional sanding pad is only activated with the sectors that are required for the geometric shape of the piece
- Preselection and activation of +/- segments to the right or left of the workpiece
- Recognition of framed pieces
- Automatic switch-on sequence of main motors
- Control and timing of the sanding rollers 45, 30 or 20 sh (only in conjunction with the option of switching the rollers on/off from the control panel)
- Checking and adjusting the working height
- Choice of sanding belt direction
- Machine operating report (working hours, machine hours)
- Production report (running metres produced)
- Checking the error messages in the event of a machine fault

FOX 500 KTR

Synchronises the automatic use of the sanding pad in the infeed or outfeed of the workpiece at any feed speed. Available on request for all machines

Fox 500

Activation of the sectors via the electronic control, which synchronises their insertion with the feed speed and allows control of the electronic link grinding shoe. (supplied as standard with the electronic sectional sanding pad).

HOLZKRAFT CASADEI Libra – Equipment options

Pressure pads

The sliding pressure bars with steel sliding pads are available for LIBRA 45 and 65 on request. Suitable for thin or deformed panels. Pressure pads for processing small window parts (type IV 68) are available on request for LIBRA 65.

*Numerous equipment options
are available on request!
Let us advise you!*
