

ZAA 2863 AF

High-performance extraction system based on the cyclone filtration system

- ▶ Effective cyclone technology with 2-stage filtration
- ▶ Separation of larger contaminants in the waste container and fine dust in the cartridge filter
- ▶ Sight glass for checking the fill level in the container
- ▶ Automatic filter cleaning for consistently high extraction performance
- ▶ Timer and on/off function possible via remote control
- ▶ Flexible manoeuvring thanks to swivel castors on the suction unit and filling container
- ▶ Easy emptying of the mobile filling container thanks to quick-release fastener
- ▶ Suitable for multiple machines thanks to adapter for three suction nozzles
- ▶ Extremely quiet

Scope of delivery:

- Filter cartridge 370 x 1190 mm
- Flexible hose
- Remote control

Model		ZAA 2863 AF
Article No.		5128928
Technical data		
Nominal volume flow	m ³ /h	1760
Negative pressure at nominal volume flow	Pa	2800
Filter area	m ²	4.32
Filter cleaning		automatic
Nominal size outside Suction nozzle inlet	mm	1 x 200, 3 x 100
Max. sound pressure level	dB(A)	78
Output power ~ 50 Hz	kW	2.4 / 400
Dimensions (L x W x H) approx.	mm	1343 x 900 x 2170
Weight approx.	kg	178

ACCESSORIES

	Article No.
1 Filter cartridge 370 x 1190 mm	5129005
2 Dust bag for filter cartridge	5129006
Chip bag for filling containers	5129007
